

Robust Swing Gates Automation

Model: **ACE-240**

FACTS:

- ▶ **Build-in Inverter for ramp-up and ramp-down speed**
State of the art control panel for automatic soft start and slow down during closure and opening to provide the smoothest and reliable operation of the gate and prolong the life-time of the gear box in the unit.
 - ▶ **Stainless Steel piston**
To prevent corrosion damaging the unit and ensuring long lasting operation.
 - ▶ **Sealed Metal Gearbox**
To prevent humidity, insects, dust and rain from damaging the unit and making it service-free unit with long lasting operation.
 - ▶ **Smart Digital Control Panel**
Built-in **Digital and Computerized control** panel with gates' position recognition which allows accuracy and reliable operation, without any excessive force on the gate or the hinges.
- ▶ **240V AC Powerful Motors**
- ▶ **For Up To 500Kg Swing Gates.**

▶ **Stainless Still Actuators to prevent corrosion of the Rams**

▶ **Over-Ride Keys**
Very easy emergency key release to put the motor on manual in case of emergency
