

# Robust Swing Gates Automation

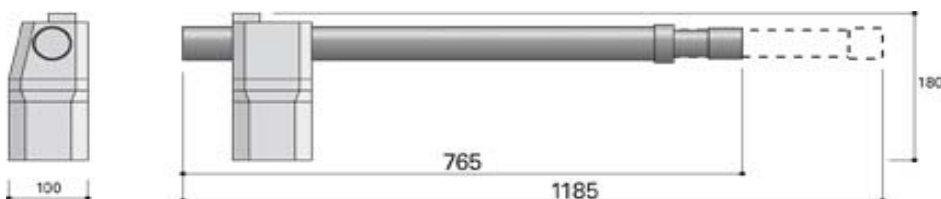

*Model* : **BRAVO**

## FACTS :

- ▶ **Build-in Inverter for ramp-up and ramp-down speed**  
State of the art control panel for automatic soft start and slow down during closure and opening to provide the smoothest and reliable operation of the gate and prolong the life-time of the gear box in the unit.
- ▶ **Stainless Steel Piston**  
To prevent corrosion damaging the unit and ensuring long lasting operation.
- ▶ **Sealed Metal Gearbox**  
To prevent humidity, insects, dust and rain from damaging the unit and making it service-free unit with long lasting operation.
- ▶ **Battery Backup**  
Built-in rechargeable battery backup, to operate the gate in case of power failure.
- ▶ **100% DUTY CYCLE**  
This robust units can open and close 300Kg./3.5m' gate non stop all day, due to its 12V Dc heavy duty motor and robust gear.
- ▶ **Over-Ride Keys**  
Very easy emergency key release to put the motor on manual in case of emergency.

*Available in Solar, 240Vac & low-voltage kit.*

*Manufactured by:*

**ECA Electronic Engineering Pty, LTD.**
