

UNDERGROUND AUTOMATION

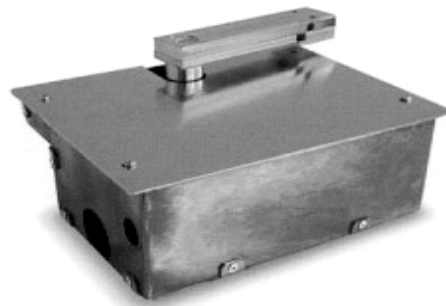

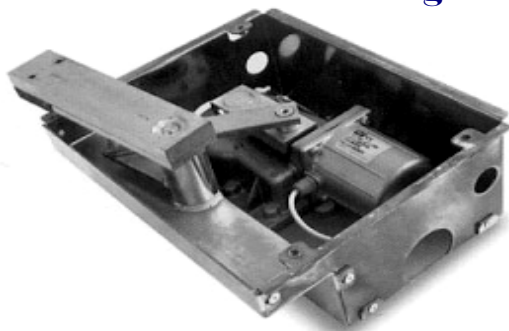

Model **X_RI200**

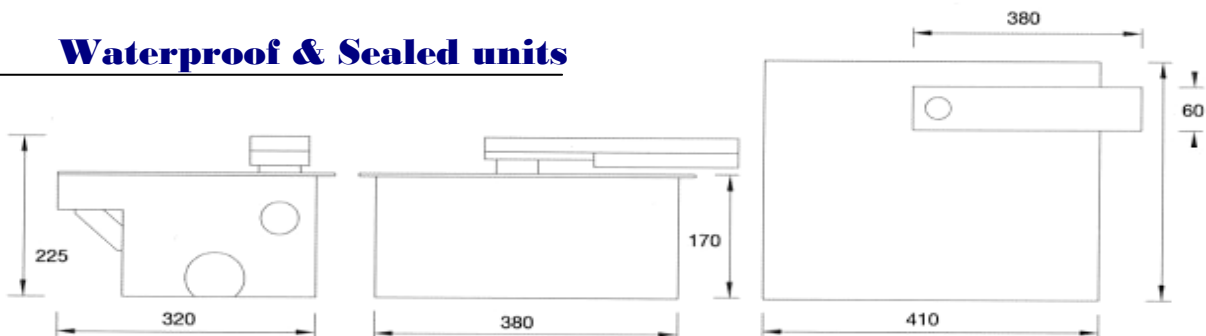

**5 Year Warranty
Says It All**

Robust Motors for long lasting operation

Waterproof & Sealed units

FACTS:

► **Smart Digital Control Panel**

Built-in **Digital and Computerized control** panel with gates' position recognition which allows accuracy and reliable operation, without any excessive force on the gate or the hinges.

► **Built-in Inverter for ramp-up and ramp-down speed**

State of the art control panel for automatic soft start and slow down during closure and opening to provide the smoothest and reliable operation of the gate and prolong the life-time of the gear box in the unit.

► **Sealed Gear Box with Galvanized Boxes**

To prevent corrosion damaging the unit and ensuring long lasting operation.

► **240V AC Powerful Motors for gates up to 500Kg each leaf**
